

AREESHA NAEEM

Data Analyst | Python Developer | Machine Learning

areesha.naeem122@gmail.com | +92311-5461408 | Attock, Pakistan | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python Developer and Data Analyst with hands-on experience in Python, SQL, and Power BI. Completed 10+ projects involving machine learning models, interactive dashboards, data analytics, and business intelligence solutions using real-world datasets. Experienced in data cleaning, exploratory data analysis, predictive modeling, and data visualization to solve business problems. Skilled in developing AI-powered applications. Looking to contribute by building data-driven solutions, automating workflows, improving reporting efficiency, and enabling smarter business decisions through analytics and machine learning.

WORK EXPERIENCE

Data Analyst Intern — Pakistan Aeronautical Complex (PAC), Kamra

Jul 2025 – Aug 2025

- Built interactive Power BI dashboards and automated Excel reports tracking 10+ KPIs across manufacturing and operational units, reducing manual reporting effort for engineering teams.
- Cleaned and pre-processed production datasets using Python and Excel; wrote optimized SQL queries to extract data from relational databases and identify production bottlenecks.

KEY PROJECTS

Supply Chain Dashboard | Power BI

- Analyzed 186.9M gross revenue, 3M+ shipments across 7 suppliers and 16 SKUs — surfaced delay patterns and 3 underperforming supplier routes.

Customer Churn Prediction System | Python

- Built an end-to-end customer churn prediction solution using Python, Machine Learning, EDA, and Streamlit, including data preprocessing, analysis, model building, and deployment for real-time business insights.

Ecommerce Sales Analysis Dashboard | SQL, Power BI

- Analyzed e-commerce sales data generating \$500K+ revenue insights, processed orders across multiple cities and customers, and built an interactive Power BI Dashboard to identify top-performing products, customer segments and sales trends.

Python EDA Project | Python

- Cleaned 11,252-row customer dataset; handled missing values, outliers, duplicates; delivered targeting and inventory recommendations backed by 10+ statistical visualizations.

Annual Store Sales Dashboard | Microsoft Excel

- Identified top customer segment (women aged 30–49) and top 3 revenue channels contributing 80% of total sales via cross-channel analysis.

Music Store SQL Analysis | SQL

- Queried 11-table relational database with 12 complex SQL queries (JOINS, CTEs, subqueries) identified top artists, genres, and highest-value customers.

EDUCATION

Bachelor of Computer Science — COMSATS University Islamabad, Attock Campus

2022 – 2026

CERTIFICATIONS & AWARDS

Top Performer — Data buzz Power BI Challenge, April 2026 | Data Analysis with Python DA0101EN — IBM, Cognitive Class

TECHNICAL SKILLS

Visualization: Power BI, Excel Dashboards

Databases: MySQL, PostgreSQL

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Machine Learning

Analytics: KPI Design, Data Cleaning

Excel Tools: Pivot Tables, Power Query
